

Lot Size Influence

Lot size has very little to no influence on sampling plans.

A common misperception Because of standard tables

1. Select Lot Size

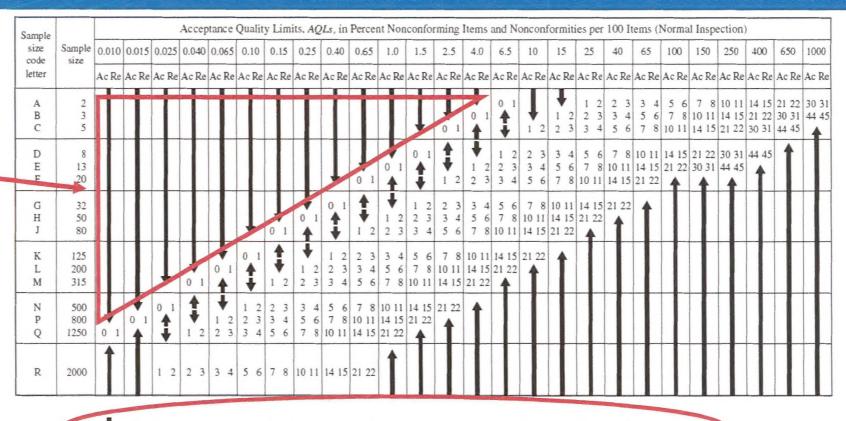

2. ...

Use the first sampling plan below the arrow. If sample size equals, or exceeds, lot size, carry out 100 percent inspection.

Use the first sampling plan above the arrow

Ac = Acceptance number.

Re = Rejection number.

- Down Arrow Note is commonly overlooked.
- Minimum sample size is necessary to achieve lower AQL levels.
